

Cryogenic and Industrial Gas Services

As a comprehensive service company to the high pressure and industrial gas industry with five U.S. locations, AMKO specializes in cryogenic trailer rehabs.

Other product lines and services AMKO offers are:

- Vacuum jacketed piping and installation
- Modules to control pressure and temperature
- Modules to manage hospital backup controls
- Field vacuum investigation and repair

AMKO Customer Focus

The key to success for any services company is delivery that meets customer expectations. AMKO follows strict safety guidelines and continually improves its quality, delivery and cost reduction processes using Six Sigma practices.

AMKO Rehab Concept & Goals

AMKO team members from across the organization in a variety of positions developed the AMKO Rehab Concept. This included engineering, cryo

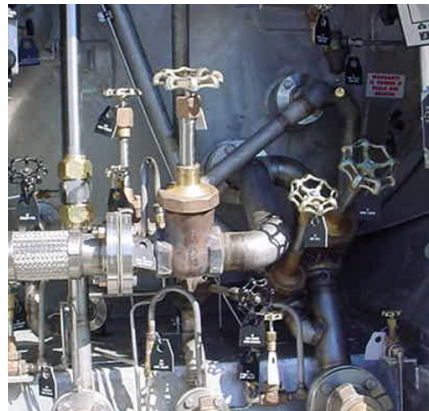

technicians, project leaders, and vacuum and material specialists. The team originated in 1999 is now a Six Sigma team that meets regularly to reassess current designs and suggest improvements.

The AMKO Rehab Concept strives to accomplish the following:

- Improve overall safety
- Reduce cost
- Reduce cycle time
- Improve reliability
- Improve and standardize designs
- Integrate system designs where possible
- Identify key conditions to control costs
- Increase the life of the trailer

Why Choose AMKO's Rehab Concept?

AMKO has over 35 years experience working on cryogenic equipment for the industrial gas industry. AMKO's technicians are skilled, trained and certified to perform tasks to rehab cryogenic trailers.

Cryogenic Trailer Rehab Concept

In addition to our experience, customers choose AMKO's Trailer Rehab Concept to benefit from:

- Reduced Praxair Materials Management, Technical Support and Engineering costs
- Standard work scopes drives efficiencies
- Increase in new material requirements
- Reduction in labor requirements
- Overall savings
- Extended life of the trailer
- Engineering improvements to reduce roll over risk
- Extend the time between rehabs
- Lower maintenance and repair costs
- Lower cost to Praxair in field inspection
- AMKO Extended three year structural warranty on selected components

AMKO Worldwide Service

Companies (oil field services, chemical, major industrial gas to small packaged gas distributors) from across the United States and around the world have called on AMKO services to provide products and on-site solutions whether it is a stationary or mobile vessel (rail, sea, road).
