

Cryogenic and Industrial Gas Services

As a comprehensive service company to the high pressure and industrial gas industries with five U.S. locations, AMKO specializes in the cryogenic trailer, mobile high pressure and stationary tube rehabilitation including repair and acoustic emission (AE) testing. Other product lines and services AMKO offers are:

- Vacuum-jacketed piping and installation
- Cryogenic modules to
 - Control pressure and temperature
 - Manage hospital backup controls
- Field vacuum investigation and repair

AMKO Customer Focus

The key to success for any services company is delivery that meets customer expectations. AMKO follows strict safety guidelines and continually improves its quality processes using Six Sigma practices.

AMKO Standard Modules

The most popular modules are built to satisfy a range of requirements from atmospheric to flammable cryogenics. The standard modules come in a range of pressures from 300 to 600 psig. The module service will dictate the material used: stainless steel, copper, and brass.

Why Buy Your Modules from AMKO?

- Knowledgeable staff
- Quality product
- Built to a high-safety design
- Ongoing engineering to ensure current standards are met
- Engineering services on hand
- Standardized manufacturing process
- Silver-brazed joints for copper modules
- Silfoss used on hospital module joints
To eliminate flux residue in the piping
- TIG welded stainless modules
- Tested to design pressure after assembly and before shipment
- AMKO purchases all module parts for manufacturing
- Preferred parts manufacturers:
Watts Valve, Kaye MacDonald, Type K-copper
- Custom modules can be built from a drawing and bill of material
- Purchasing power can reduce customer's price
