

Vacuum & Repair Services

ISO 9001:2000 Certified

Cryogenic and Industrial Gas Services

As a comprehensive service company to the high pressure and industrial gas industries with five U.S. locations, AMKO specializes in the cryogenic trailer, mobile high pressure and stationary tube rehabilitation including repair and acoustic emission (AE) testing. AMKO also offers vacuum-jacketed pipe manufacture and installation. Field vacuum investigation and repair is another highly valued AMKO service.

AMKO Customer Focus

The key to success for any services company is delivery that meets customer expectations to satisfy those needs. AMKO follows strict safety guidelines and continually improves its quality processes using Six Sigma practices.

Vacuum Investigation and Repair Services

When an issue arises in a tank, trailer or railcar such as icing on the external tank, a higher than normal evaporation rate (NER), or unexplained losses, the culprit may be a leak. The leak may be in the inner or outer tank or the piping. Using a mass spectrometer, a skilled vacuum technician can locate and recommend a course of action to fix the problem.

If the tank, trailer or railcar cannot be brought into an AMKO facility to be serviced, the work can be performed on-site by one of AMKO's qualified vacuum technicians. Performing the work on-site can minimize the time the problem equipment is off-line.

technicians are certified to ASNT Level II and have 20-plus years working with vacuums and cryogenic equipment.

AMKO vacuum technicians are trained and certified to perform the necessary DOT and ASME repairs in the field.

AMKO Worldwide Service

Companies (oilfield services, chemical, major industrial gas to small packaged gas distributors) from across the United States and around the world have called on AMKO vacuum services to provide on-site solutions to difficult problems, whether it be a stationary or mobile vessel (rail, sea, road)

Working on the equipment in-place avoids crane costs for removal and installation as well as transportation costs to and from the service center.

AMKO Experience / Certifications

AMKO has over 35 years of experience working on cryogenic equipment for the industrial gas industry. AMKO's vacuum
